

HUMAN RESOURCE MANAGEMENT INFORMATION SYSTEM (HRIS)

Software Module Blueprint for Philippine Educational Institutions and Private Businesses

Including direct employees, faculty, consultants, security, janitorial and specialty outsourced personnel

Purpose. This document converts the HR policy framework into a software-development structure. It identifies the modules, users, workflows, records, controls and integrations that an HRIS should support. The design uses a shared core so one platform can serve either a private educational institution or a general private business, while enabling sector-specific modules only when needed.

Legend	Meaning
CORE	Required for almost all organizations.
EDU	Education-specific capability for private schools, colleges, universities and training institutions.
BUS	Private-business-specific capability.
OUTSOURCE	Cross-cutting capability for third-party personnel and service contractors.
MVP	Build first; needed for normal daily operations and legal compliance.
Phase 2	Add after core operations are stable.
Phase 3	Advanced automation, analytics or optimization.

1. Recommended System Architecture

- One Employee/Worker Master Record should be the single source of truth for direct employees, faculty, consultants and contractor personnel.
- Use role-based access control (RBAC): HR Admin, Recruiter, Payroll, Department Head, Faculty/Employee, Finance, Compliance, Safety Officer, Contractor Supervisor, Auditor and Executive Management.
- Use workflow approvals rather than email-only approvals. Every approval, edit and status change should create an audit trail.
- Keep payroll, medical, disciplinary and investigation records under stricter permissions than ordinary personnel data.
- Allow modules to be enabled or disabled by organization type: Education, General Business, or both.
- Contractor personnel should be visible for site access, safety and compliance, but employer functions should remain distinguishable from direct-employee HR functions.
- All legal rates, wage tables, contribution tables, holidays and policy parameters should be effective-dated so new rules do not overwrite historical payroll records.

2. Module Map

ID	Module	Applicability	Priority
M01	Organization & HR Configuration	CORE	MVP
M02	Worker / Employee Master Data	CORE	MVP
M03	Recruitment & Applicant Tracking	CORE	MVP
M04	Onboarding & Employment Documents	CORE	MVP
M05	Time, Attendance & Scheduling	CORE	MVP
M06	Leave & Absence Management	CORE	MVP
M07	Payroll & Statutory Pay	CORE	MVP
M08	Benefits & Government Contributions	CORE	MVP
M09	Performance Management	CORE	Phase 2
M10	Learning & Development	CORE	Phase 2
M11	Employee Relations, Grievance & Discipline	CORE	MVP
M12	Separation, Clearance & Retirement	CORE	MVP
M13	Contractor & Outsourced Workforce Management	OUTSOURCE	MVP
M14	Occupational Safety & Health	CORE/OUTSOURCE	MVP
M15	Data Privacy, Documents & Records Retention	CORE	MVP
M16	Self-Service, Requests & Approvals	CORE	MVP
M17	HR Compliance & Legal Rules Engine	CORE	MVP
M18	HR Analytics, Dashboards & Audit	CORE	Phase 2
M19	Faculty & Academic Personnel Management	EDU	MVP for schools
M20	Faculty Load, Schedule & Overload	EDU	MVP for schools
M21	Faculty Evaluation, Rank & Promotion	EDU	Phase 2
M22	Faculty Development, Research & Credentials	EDU	Phase 2
M23	Student-Safeguarding / Faculty Conduct Link	EDU	Phase 2
M24	Sales / Commission & Incentive Management	BUS	Optional
M25	Shift, Field & Branch Workforce Management	BUS	Optional
M26	Succession, Talent & Workforce Planning	CORE/BUS/EDU	Phase 3
M27	AI Assistance & Automation	CORE	Phase 3
M28	SDG / ESG Workforce Reporting	CORE	Phase 3

M01 - Organization & HR Configuration

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	HR Super Admin; System Admin
Core functions	Company/school profile; campuses/branches; departments; positions; job grades; reporting lines; cost centers; employment types; work calendars; approval matrices; policy parameters.
Typical workflow	Create organization -> define units -> define positions -> assign approvers -> activate policy/rate tables.
Key data/entities	organizations, campuses, branches, departments, positions, job_grades, cost_centers, approval_rules, calendars
Compliance / control rules	Effective-dated configuration; no destructive changes to historical rules; approval matrix versioning.
Integrations	Finance/ERP; identity provider; HR dashboards

M02 - Worker / Employee Master Data

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	HR; employee; managers; authorized auditors
Core functions	Single profile for employees, faculty, consultants and contractor workers; IDs; contact data; emergency contacts; dependents; employment history; status; compensation profile; credentials; documents; assigned location.
Typical workflow	Create/verify worker -> classify relationship -> assign position/location -> attach documents -> activate.
Key data/entities	persons, worker_profiles, employments, assignments, contacts, dependents, credentials, documents, bank_accounts
Compliance / control rules	Separate direct employee vs contractor worker; sensitive-data permissions; change history; duplicate detection.
Integrations	Payroll; timekeeping; access control; LMS; government files

M03 - Recruitment & Applicant Tracking

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	Recruiters; hiring managers; HR
Core functions	Manpower request; vacancy approval; job posting; applicant portal; screening; interview scoring; reference/background-check tracking; offer approval; talent pool.
Typical workflow	Manpower request -> approval -> posting -> application -> screening -> interview -> offer -> hire/reject.
Key data/entities	job_requisitions, vacancies, applicants, applications, interviews, scorecards, offers, background_checks
Compliance / control rules	Anti-discrimination controls; lawful collection of applicant data; retention period; no automated rejection without review for high-impact decisions.
Integrations	Job boards; email/SMS; calendar; background-check vendors

M04 - Onboarding & Employment Documents

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	HR; new hire; manager; IT/Admin
Core functions	Pre-employment checklist; contract generation; probationary standards acknowledgment; handbook/policy acknowledgment; government-number capture; equipment/access requests; orientation.
Typical workflow	Offer accepted -> requirements -> contract -> approvals/signature -> orientation -> access/equipment -> active employee.
Key data/entities	onboarding_cases, checklists, contracts, acknowledgments, equipment_requests, access_requests
Compliance / control rules	Required probationary standards recorded at engagement; document version and signature timestamps; privacy notices.
Integrations	E-signature; document storage; IT ticketing; access control

M05 - Time, Attendance & Scheduling

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	Employees; faculty; supervisors; payroll
Core functions	Clock-in/out; biometric/QR/web/mobile attendance; schedules; shifts; tardiness; undertime; overtime request/approval; night work; rest-day/holiday work; official business; corrections.
Typical workflow	Schedule -> time capture -> exception -> employee/supervisor correction -> approval -> payroll posting.
Key data/entities	time_logs, schedules, shifts, overtime_requests, attendance_exceptions, holidays
Compliance / control rules	8-hour rules and applicable exclusions; authorized/allowed overtime handling; night differential window; historical holiday calendar; immutable raw time logs.
Integrations	Biometrics; turnstiles; payroll; calendar

M06 - Leave & Absence Management

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	Employees; managers; HR
Core functions	Leave types; statutory and company leaves; accrual; balances; filing; attachments; approvals; leave conversion; return-to-work; absence tracking.
Typical workflow	Request -> validate entitlement/balance -> approve -> update calendar/balance -> payroll effect.
Key data/entities	leave_types, leave_entitlements, leave_balances, leave_requests, leave_transactions
Compliance / control rules	Effective-dated eligibility; statutory leave rules; no negative balance unless policy permits; restricted medical attachments.
Integrations	Payroll; calendar; employee self-service

M07 - Payroll & Statutory Pay

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	Payroll; HR; Finance; authorized auditors
Core functions	Payroll periods; basic pay; hourly/daily/monthly calculations; overtime; premium pay; night differential; holiday pay; allowances; deductions; 13th-month pay; final pay; retro adjustments; payslips.
Typical workflow	Approved time/leave -> payroll calculation -> validation -> approval -> bank/payment file -> payslip -> GL posting.
Key data/entities	payroll_runs, pay_items, earnings, deductions, tax_records, payslips, payroll_adjustments
Compliance / control rules	Effective-dated wage and premium tables; audit trail; maker-checker approval; locked completed payroll; legal deductions only; historical recalculation capability.
Integrations	Timekeeping; Finance/GL; banks; BIR/government files

M08 - Benefits & Government Contributions

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	HR Benefits; Payroll; employees
Core functions	SSS, PhilHealth, Pag-IBIG records; employer/employee contributions; HMO; insurance; loans; dependents; company benefits; retirement plan.
Typical workflow	Eligibility -> enrollment -> payroll deduction/contribution -> remittance file -> reconciliation.
Key data/entities	benefit_plans, enrollments, contribution_tables, remittances, dependents, loans
Compliance / control rules	Rate tables must be effective-dated; reconciliation of payroll deductions against remittances; audit exceptions.
Integrations	Payroll; government portals/files; HMO/insurers

M09 - Performance Management

Scope: CORE | Priority: Phase 2

Area	System Requirements
Primary users	Employees; managers; HR; executives
Core functions	Goal/KPI setting; competency ratings; probationary evaluation; midyear/final review; 360 review; PIP; calibration; promotion input.
Typical workflow	Goal plan -> check-ins -> evaluation -> calibration -> employee acknowledgment -> development/PIP.
Key data/entities	performance_cycles, goals, competencies, evaluations, reviewers, pips
Compliance / control rules	Employees see standards before evaluation; reviewer permissions; rating calibration audit; PIP not automatically equal to termination.
Integrations	Learning; compensation; succession; analytics

M10 - Learning & Development

Scope: CORE | Priority: Phase 2

Area	System Requirements
Primary users	L&D; employees; faculty; managers
Core functions	Training catalog; mandatory courses; registrations; attendance; certifications; CPD; training budgets; skills matrix; training effectiveness.
Typical workflow	Need identified -> approval -> enroll -> complete -> assess -> update skill/credential.
Key data/entities	courses, sessions, enrollments, training_records, competencies, certifications
Compliance / control rules	Mandatory compliance training tracking; credential expiry alerts; training evidence retention.
Integrations	LMS; calendar; expense system

M11 - Employee Relations, Grievance & Discipline

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	HR ER; authorized committee; legal; employees
Core functions	Complaints; grievances; whistleblower reports; incident cases; Notice to Explain; evidence; meetings/hearings; decisions; sanctions; appeal/reconsideration; retaliation flag.
Typical workflow	Report -> triage -> assign investigator -> notice/opportunity to explain -> evaluate -> decision -> appeal/close.
Key data/entities	cases, allegations, parties, evidence, notices, meetings, findings, sanctions, appeals
Compliance / control rules	Strict confidentiality; due-process checklist; conflict-of-interest recusal; need-to-know access; separate complainant/witness protections.
Integrations	Document management; email/SMS notices; legal archive

M12 - Separation, Clearance & Retirement

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	HR; Finance; IT/Admin; managers
Core functions	Resignation; retirement; end of valid term/project; termination cases; redundancy/retrenchment workflow; clearance; property return; access revocation; final pay; COE; exit interview.
Typical workflow	Separation request/case -> legal/HR checks -> approvals -> clearance -> final pay -> COE -> deactivate access -> archive.
Key data/entities	separations, clearances, assets, final_pay, exit_interviews, certificates
Compliance / control rules	Termination reason and due-process linkage; authorized-cause documents; access revocation; record retention.
Integrations	Payroll; IT access; asset management; Finance

M13 - Contractor & Outsourced Workforce Management

Scope: OUTSOURCE | Priority: MVP

Area	System Requirements
Primary users	Procurement; HR; Security/Admin; contractor supervisor; Compliance
Core functions	Contractor accreditation; DOLE/agency/license data; contracts; service scope; deployed worker roster; site assignment; proof of payroll/remittances; SLAs; incident tracking; audit scorecard; renewal/blacklist.
Typical workflow	Accredit contractor -> approve contract -> register/deploy workers -> monthly compliance -> SLA/audit -> renew/suspend/terminate.
Key data/entities	contractors, service_contracts, contractor_workers, deployment, compliance_documents, sla_metrics, audits
Compliance / control rules	Flag possible labor-only contracting risks; principal vs contractor roles separated; contractor registration/license expiry alerts; monthly evidence; contractor supervisor remains employer-side channel.
Integrations	Procurement; Accounts Payable; access control; OSH; document storage

M14 - Occupational Safety & Health

Scope: CORE/OUTSOURCE | Priority: MVP

Area	System Requirements
Primary users	Safety officer; HR; employees; contractor supervisors
Core functions	Hazard register; risk assessments; PPE; safety training; incidents/near misses; first aid; medical surveillance where lawful; safety committee; drills; corrective actions; contractor safety.
Typical workflow	Hazard/incident -> report -> investigate -> corrective action -> verify closure -> trend analysis.
Key data/entities	hazards, risk_assessments, incidents, injuries, ppe, trainings, corrective_actions, drills
Compliance / control rules	Cover direct and contractor workers where applicable; restricted health data; escalation for serious incidents; overdue corrective actions.
Integrations	Access/site roster; HR master; contractor module; analytics

M15 - Data Privacy, Documents & Records Retention

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	DPO; HR; Legal; authorized users
Core functions	Document repository; classification; access controls; consent/notice records where applicable; retention rules; deletion/legal hold; data-subject request log; breach/incident linkage; processor/vendor register.
Typical workflow	Collect -> classify -> authorize access -> retain -> legal hold/delete -> audit.
Key data/entities	documents, document_versions, privacy_notices, processing_activities, vendors, retention_rules, legal_holds
Compliance / control rules	DPA safeguards; outsourcing agreements for processors; least privilege; audit logs; encryption; retention and secure deletion.
Integrations	DMS/cloud storage; identity/access; security monitoring

M16 - Self-Service, Requests & Approvals

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	Employees; faculty; managers; HR
Core functions	Employee profile update; leave; OT; certificates; HR letters; benefits requests; payroll queries; incident/grievance routing; manager approvals; notifications.
Typical workflow	Request -> validation -> workflow routing -> approval/rejection -> fulfillment -> notification.
Key data/entities	service_requests, workflow_instances, approvals, notifications, attachments
Compliance / control rules	Full approval trail; delegated approver rules; SLA; no sensitive case details exposed to unauthorized approvers.
Integrations	Email/SMS/push; HR modules; e-signature

M17 - HR Compliance & Legal Rules Engine

Scope: CORE | Priority: MVP

Area	System Requirements
Primary users	HR Compliance; Legal; Payroll; auditors
Core functions	Legal obligations register; wage orders; statutory rates; contribution tables; holiday rules; leave rules; contractor registrations; policy versioning; compliance calendar; alerts; audit checklist.
Typical workflow	Regulation/rate update -> legal review -> effective date -> configure -> test -> approve -> deploy -> audit.
Key data/entities	legal_rules, rule_versions, rate_tables, compliance_tasks, obligations, attestations
Compliance / control rules	Never hard-code rates without effective date; maker-checker approval; historical rule preservation; jurisdiction/location-based rules.
Integrations	Payroll; leave; timekeeping; contractor module; dashboard

M18 - HR Analytics, Dashboards & Audit

Scope: CORE | Priority: Phase 2

Area	System Requirements
Primary users	Executives; HR; Finance; auditors
Core functions	Headcount; payroll cost; turnover; absenteeism; vacancies; time-to-hire; training; performance; diversity; safety; contractor compliance; legal compliance; audit logs; drill-down.
Typical workflow	Operational modules -> data warehouse/reporting -> KPI validation -> management dashboard.
Key data/entities	kpi_definitions, snapshots, audit_logs, report_subscriptions
Compliance / control rules	Row-level permissions; KPI definitions documented; no misleading comparison between unlike employment categories; privacy-preserving aggregated reports.
Integrations	All HR modules; BI tools

M19 - Faculty & Academic Personnel Management

Scope: EDU | Priority: MVP for schools

Area	System Requirements
Primary users	HR; Academic Affairs; Deans; Program Chairs
Core functions	Faculty profile; full-time/part-time status; academic rank; degree/field; PRC/professional licenses; subjects qualified to teach; appointment history; consultation hours; institutional service.
Typical workflow	Verify credentials -> faculty appointment -> assign program/department -> define qualified subjects -> active faculty.
Key data/entities	faculty_profiles, academic_ranks, degrees, licenses, qualified_subjects, appointments
Compliance / control rules	Credential verification; qualification-to-subject alignment; education-sector rules; faculty manual acknowledgment.
Integrations	Registrar/SIS; LMS; PRC verification where available; HR master

M20 - Faculty Load, Schedule & Overload

Scope: EDU | Priority: MVP for schools

Area	System Requirements
Primary users	Academic Affairs; Deans; Chairs; HR/Payroll; faculty
Core functions	Teaching assignments; units/hours; class schedule; overload; substitutions; consultation; research/service load; multiple campuses; conflict detection; pay computation feed.
Typical workflow	Section demand -> assign faculty -> validate qualifications/conflicts/load -> approve -> publish -> payroll overload.
Key data/entities	teaching_assignments, sections, teaching_loads, overloads, substitutions, consultation_hours
Compliance / control rules	Maximum/standard load rules configurable; qualification and schedule conflict validation; overload requires approval; effective-dated rates.
Integrations	SIS/Registrar; timetabling; payroll; LMS

M21 - Faculty Evaluation, Rank & Promotion

Scope: EDU | Priority: Phase 2

Area	System Requirements
Primary users	Faculty; students; peers; deans; HR; academic committees
Core functions	Student evaluation; peer/dean observation; teaching portfolio; research/service scoring; rank criteria; promotion applications; committee review; calibration.
Typical workflow	Collect evaluations -> compute weighted evidence -> committee review -> rank/promotion decision -> archive.
Key data/entities	faculty_evaluations, observations, portfolios, rank_criteria, promotion_cases
Compliance / control rules	Student ratings should not be sole determinant; anonymous evaluation controls; documented rank criteria; committee audit trail.
Integrations	SIS/LMS; performance module; research module

M22 - Faculty Development, Research & Credentials

Scope: EDU | Priority: Phase 2

Area	System Requirements
Primary users	Faculty Development; Research Office; HR; faculty
Core functions	Graduate studies; scholarships; CPD; seminars; research/publication records; conferences; certifications; credential expiry; return-service obligations.
Typical workflow	Development request -> approval/funding -> completion -> proof -> competency/credential update.
Key data/entities	faculty_development, scholarships, research_outputs, publications, certifications, return_service
Compliance / control rules	Track contractual obligations; verify credentials; privacy/security for research records; expiry alerts.
Integrations	LMS; Finance; research repository

M23 - Student-Safeguarding / Faculty Conduct Link

Scope: EDU | Priority: Phase 2

Area	System Requirements
Primary users	Student Affairs; HR ER; Safeguarding committee; authorized administrators
Core functions	Controlled referral between student complaint system and HR case management; faculty/student boundary concerns; harassment/safe-spaces cases; temporary measures; evidence segregation.
Typical workflow	Student report -> safeguarding triage -> HR referral if employee involved -> coordinated investigation -> outcome with limited disclosures.
Key data/entities	safeguarding_cases, referrals, protective_measures, linked_hr_case_ids
Compliance / control rules	Strict segregation of student and HR records; least privilege; anti-retaliation; due process; privacy.
Integrations	Student Affairs case system; HR discipline; campus security

M24 - Sales / Commission & Incentive Management

Scope: BUS | Priority: Optional

Area	System Requirements
Primary users	Sales Ops; HR; Payroll; Finance
Core functions	Commission plans; quotas; incentive rules; attainment imports; approvals; clawbacks; disputes; payout feed.
Typical workflow	Sales results -> rule calculation -> manager validation -> payroll payout -> dispute/adjustment.
Key data/entities	commission_plans, quotas, attainment, payouts, adjustments
Compliance / control rules	Effective-dated plans; transparent formulas; approval and dispute trail.
Integrations	CRM; payroll; Finance

M25 - Shift, Field & Branch Workforce Management

Scope: BUS | Priority: Optional

Area	System Requirements
Primary users	Operations; branch managers; employees; HR
Core functions	Multi-branch assignments; rosters; rotating shifts; fieldwork; geo/onsite confirmation where lawful; temporary transfers; relief pool; staffing coverage.
Typical workflow	Demand -> roster -> assignment -> attendance -> exceptions -> payroll.
Key data/entities	branches, rosters, field_assignments, relief_pool, staffing_requirements
Compliance / control rules	Privacy/proportionality for location monitoring; rest-day and working-time rules; temporary assignment history.
Integrations	Timekeeping; payroll; mobile app

M26 - Succession, Talent & Workforce Planning

Scope: CORE/BUS/EDU | Priority: Phase 3

Area	System Requirements
Primary users	Executives; HR; department heads
Core functions	Critical positions; successors; readiness; flight risk; skills gaps; retirement projections; manpower scenarios; budget planning.
Typical workflow	Annual planning -> critical roles -> nominate successors -> development plan -> periodic readiness review.
Key data/entities	critical_roles, successors, readiness, talent_pools, workforce_scenarios
Compliance / control rules	Limit sensitive talent data; avoid purely automated promotion/succession decisions; documented criteria.
Integrations	Performance; L&D; analytics; Finance

M27 - AI Assistance & Automation

Scope: CORE | Priority: Phase 3

Area	System Requirements
Primary users	HR; managers; employees
Core functions	HR chatbot; policy Q&A; document drafting; applicant summarization; anomaly detection; workforce forecasting; suggested workflows; classification assistance.
Typical workflow	User request/data -> AI suggestion -> human review -> approved action -> audit log.
Key data/entities	ai_requests, prompts, outputs, approvals, model_versions
Compliance / control rules	No unchecked final decisions for hiring, discipline, promotion, termination or compensation; block unauthorized sensitive-data submission; log material AI use.
Integrations	HR knowledge base; workflow engine; analytics

M28 - SDG / ESG Workforce Reporting

Scope: CORE | Priority: Phase 3

Area	System Requirements
Primary users	Executives; HR; ESG/Sustainability
Core functions	Workforce indicators linked to SDG 3, 4, 5, 8, 10, 12, 13, 16 and 17 as relevant; wellness, training, equality, decent work, safety, ethical contracting and governance metrics.
Typical workflow	Define KPI -> collect validated data -> aggregate -> approve -> report/export.
Key data/entities	sdg_metrics, metric_definitions, reporting_periods, evidence
Compliance / control rules	Use measurable evidence; distinguish aspirational goals from legal requirements; protect employee privacy in published data.
Integrations	HR analytics; OSH; L&D; contractor module

3. Recommended End-to-End Workflows

Process	Modules involved	Developer notes
Hire-to-Retire	M03 -> M04 -> M02 -> M05/M06 -> M07/M08 -> M09/M10 -> M12	Use one worker ID across every module. Employment status changes should be effective-dated.
Faculty Appointment-to-Teaching	M03/M04 -> M19 -> M20 -> M07 -> M21/M22	Do not allow assignment to a subject if required qualification rules fail, unless an authorized exception process exists.
Contractor-to-Site	M13 -> M02 limited profile -> M14 -> access control -> M18	Worker is linked to contractor, deployment site and contract. Do not convert contractor worker into a direct employee record accidentally.
Complaint-to-Decision	M16/M23 -> M11 -> notices/evidence -> decision -> M18	Case permissions must be much stricter than ordinary HR records.
Attendance-to-Payroll	M05 + M06 -> M17 rules -> M07 -> M08 -> Finance	Raw attendance, approved corrections and calculated payroll should be independently auditable.
Law/Rate Change	M17 -> sandbox test -> approval -> M05/M06/M07/M08 -> audit	Never overwrite old rates. Store effective_from/effective_to and rule version.

4. Recommended User Roles and Access

Role	Typical access
HR Super Admin	Configuration, worker records, workflows; not automatically unrestricted to medical/investigation data.
Recruiter	Recruitment and applicant records; limited employee data after hire.
Payroll Officer	Compensation, time inputs, payroll, statutory contributions; limited grievance/medical data.
HR Employee Relations	Grievance/discipline case records; limited payroll data unless necessary.
Department Head / Dean	Team records, requests, performance and schedules; no unrelated confidential cases.
Employee / Faculty	Own profile, payslips, leave, requests, evaluations as policy permits.
Contractor Supervisor	Own deployed workers, attendance/service issues and compliance submissions; no direct-employee confidential data.
Safety Officer	OSH records, worker/site roster, incident data; restricted health details.
DPO / Privacy	Privacy controls, processing inventory, data requests, breach-related access.
Auditor	Read-only, time-limited access with complete audit logging.
Executive	Aggregated dashboards and approved drill-down; not default access to all personal files.

5. Core Database Design - Main Entity Groups

Domain	Suggested entities
Identity	persons, users, roles, permissions, worker_profiles, contacts, addresses
Employment	employments, assignments, positions, departments, job_grades, compensation_profiles
Recruitment	job_requisitions, applicants, applications, interviews, offers
Time/Leave	time_logs, schedules, shifts, overtime_requests, leave_requests, leave_balances
Payroll	payroll_runs, pay_items, earnings, deductions, payslips, remittances
Performance/L&D	goals, evaluations, competencies, pips, courses, training_records, certifications
Cases	cases, parties, allegations, evidence, notices, findings, sanctions, appeals
Contractors	contractors, service_contracts, contractor_workers, deployment, compliance_documents, audits
Education	faculty_profiles, academic_ranks, qualified_subjects, teaching_assignments, teaching_loads, faculty_evaluations

For software planning and HR governance; validate current legal rates and rules before production use.

Compliance	legal_rules, rate_tables, compliance_tasks, obligations, policy_versions, audit_logs
------------	--

6. Developer Rules That Should Be Non-Negotiable

- Every transaction that affects pay, employment status, disciplinary outcome, contractor compliance or access should be auditable: who, what, when, old value and new value.
- Use effective-dated records for wage rates, contribution schedules, holidays, job assignments, salary, policy versions and legal rules.
- Never delete finalized payroll. Corrections should use adjustment/reversal transactions.
- Separate raw time logs from approved attendance results. The raw log should remain immutable.
- Use maker-checker controls for payroll, legal-rate changes, employee status changes, contractor accreditation and high-risk case decisions.
- Design permissions by data sensitivity, not only by job title. Medical, payroll, grievance, whistleblower and investigation data need separate access scopes.
- Provide a complete data-retention and legal-hold mechanism. A generic "delete employee" button is unsafe.
- Contractor workers must have a contractor_id and service_contract_id. Direct employment screens should not silently treat them as company employees.
- Use configurable rules instead of hard-coded Philippine statutory percentages whenever possible. Rules change over time and sometimes vary by location.
- AI output should be advisory. Human approval must remain required for consequential employment decisions.

7. Suggested Development Roadmap

Stage	Build first	Outcome
Stage 1 - Foundation	M01, M02, RBAC, audit logs, document storage	Reliable master data and security foundation.
Stage 2 - Daily HR Operations	M03, M04, M05, M06, M16	Recruitment, onboarding, attendance, leave and employee self-service.
Stage 3 - Payroll & Compliance	M07, M08, M17	Payroll, statutory contributions and legal-rule versioning.
Stage 4 - Risk & Outsourcing	M11, M12, M13, M14, M15	Discipline, separation, contractor compliance, OSH and privacy.
Stage 5 - Education Extension	M19, M20, then M21-M23	Faculty credentials, load, overload, evaluation and safeguarding.
Stage 6 - Management Intelligence	M09, M10, M18, M26	Performance, development, analytics and succession.
Stage 7 - Advanced	M27, M28	AI assistance and SDG/ESG reporting.

8. External Integrations

Integration	Purpose	Recommended approach
Biometric / Access Control	Attendance and physical access	API/webhook or scheduled import; preserve raw device logs.
Bank / Payment System	Payroll disbursement	Encrypted bank file/API; maker-checker and reconciliation.
BIR / Government Files	Tax and statutory reporting	Generate validated export files; keep submission references.
SSS / PhilHealth / Pag-IBIG	Contribution/remittance support	Configurable export/import and reconciliation.
Email / SMS / Push	Notices, approvals, reminders	Template versioning; avoid exposing sensitive case details in notification body.
E-signature	Contracts and acknowledgments	Store signed document, signer identity, timestamp and evidence.
SIS / Registrar / LMS - Education	Faculty/subject/section synchronization	Use stable IDs; define system-of-record ownership for each field.
Finance / ERP	Payroll and cost posting	Post summarized or employee-level entries according to Finance controls.
Document Storage	Personnel files and evidence	Encryption, retention, legal hold, malware scanning and access logging.

9. Philippine Compliance Mapping for the Software

Compliance area	System implication
Labor standards	Time, payroll and leave engines need configurable working-time, overtime, premium, holiday, night-work and statutory-benefit rules.
Contracting/subcontracting	Contractor module should maintain contractor registration/compliance evidence and flag labor-only contracting risk indicators.
Occupational Safety and Health	OSH module should cover relevant direct workers and contractor/subcontractor personnel at the workplace.
Data Privacy Act	Access controls, audit logs, retention, processor contracts, security

	safeguards and data-subject request workflows are required design concerns.
Telecommuting	Remote-work policy, hours, performance, data protection and fair-treatment rules should be configurable when used.
Private higher education	Faculty records and workflows should support applicable CHED/MORPHE and program-level requirements rather than treating faculty as ordinary office staff only.

10. Suggested SDG Alignment

SDG	HRIS indicators that may be tracked
SDG 3 - Good Health and Well-Being	Safety incidents, wellness participation, sick leave trends, preventive programs.
SDG 4 - Quality Education	Faculty development, staff training hours, credential attainment, scholarship/development support.
SDG 5 - Gender Equality	Hiring, promotion and leadership representation; harassment-case governance; parental-support benefits.
SDG 8 - Decent Work and Economic Growth	Fair pay compliance, training, employment stability, contractor compliance, safety.
SDG 10 - Reduced Inequalities	Inclusive recruitment, accommodation tracking where appropriate, equitable development opportunities.
SDG 12/13 - Responsible Operations / Climate	Paperless HR, travel/remote-work indicators where useful, emergency and resilience training.
SDG 16 - Strong Institutions	Due-process completion, whistleblower protection, audit exceptions, policy compliance.
SDG 17 - Partnerships	School-industry, government and training partnerships where relevant.

11. Minimum Acceptance Criteria Before Go-Live

- Payroll parallel-run completed and reconciled against the existing payroll process for multiple pay periods.
- All user roles tested using least-privilege access, including attempts to access payroll, medical and disciplinary data without permission.
- Effective-dated rule test: old payroll reproduces using old rates after new rates are activated.
- Contractor workers cannot accidentally receive direct-employee benefits/payroll unless explicitly converted through an approved employment process.
- Audit logs cannot be edited by ordinary administrators.
- Data export, backup, restore and disaster-recovery procedures tested.
- Employee and faculty records can be retained, archived, placed on legal hold and disposed of according to approved retention rules.
- Mobile/self-service screens work on low-bandwidth connections where required.
- All critical workflows have fallback procedures if biometric devices, internet or external government/bank integrations are unavailable.
- Legal and HR owners sign off the configured Philippine labor rules before production activation.

12. Legal / Regulatory Reference Points

This software blueprint is not a substitute for legal advice. The final configured rules should be reviewed against current Philippine laws, DOLE issuances, wage orders, government contribution schedules and education regulations before go-live and whenever rules change.

- Philippine Labor Code and implementing labor standards - Department of Labor and Employment / Lawphil.
- DOLE Department Order No. 174, series of 2017 - rules on contracting and subcontracting.
- Republic Act No. 11058 and implementing rules - Occupational Safety and Health Standards.
- Republic Act No. 10173 (Data Privacy Act of 2012) and NPC Implementing Rules, especially outsourcing/subcontracting safeguards.
- Republic Act No. 11165 (Telecommuting Act) and applicable implementing rules.
- Commission on Higher Education - Manual of Regulations for Private Higher Education (MORPHE) and applicable program-specific policies, standards and guidelines.
